# Cross-validation for TS with the library *fable*

Juan Garbayo

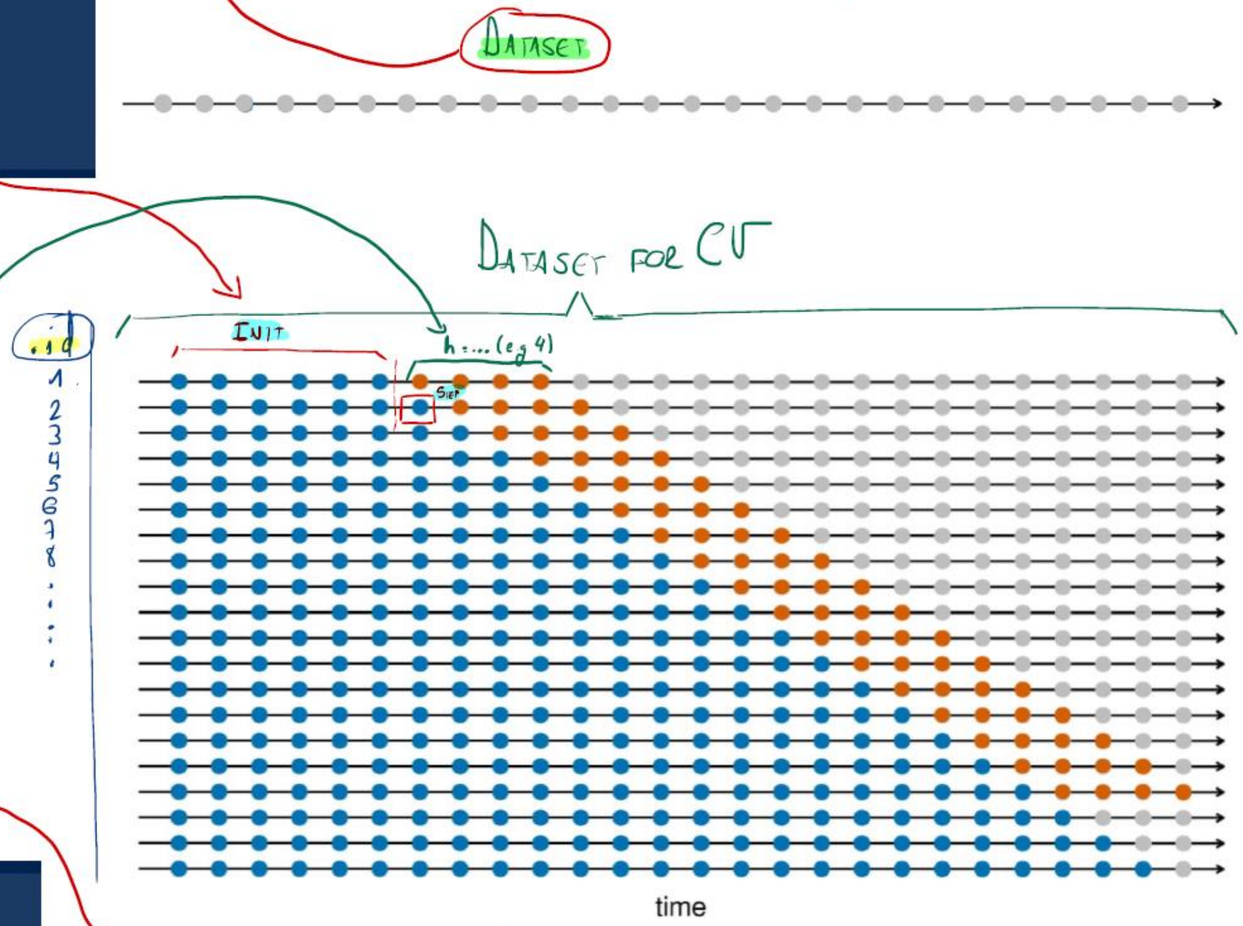
Forecasting & Time Series Analysis

ie UNIVERSITY

# Clarification: dataset for CV

```r
dataset_cv <-
  stretch_tsibble(dataset, .init= INIT, .step = STEP)

fit_cv <-
  dataset_cv %>%
  model(
    model_1 = ... ,
    model_2 = ...
  )
```



```r
fc_cv <- fit_cv %>% forecast(h=...)

accuracy_cv <-
  fc_cv %>%
  accuracy(dataset) %>%
  ...
```

→ The original dataset!!

↳ Contains the entire range of values.
